WE AIM TO OFFER OUR CUSTOMERS SUSTAINED ECONOMIC GROWTH AND LONG-TERM VALUES

I want to welcome you as Managing Director and Proprietor of Company LITZ-Konfektion GmbH in the second generation with our new Corporate Profile and want to convince you with the following pages also to become a partner of LITZ Individual Work Wear

ENG. RUPERT FRANZ LITZLBAUER
Managing Director

ABOUT US

1961 company LITZ was founded from Gertrude and Rupert Litzlbauer.
From the beginning on the story of success runs likes a thread through the family chronicle.

Since **1997 Eng. Rupert Litzlbauer** manages the company successfully and treads a new innovative path in production. The safety of the customers is taken care of by new developed, acid-resistant, hard inflammable, EN471 tested and also antistatic Multinorm fabrics with flash barrier class 1-2.

We offer inter-branch Design solutions in the area of safety at work for Industry & Trade

For more than 40 years LITZ specialises in
Work Protective Wear and Gastronomic Wear in Corporate Identity Fashion.

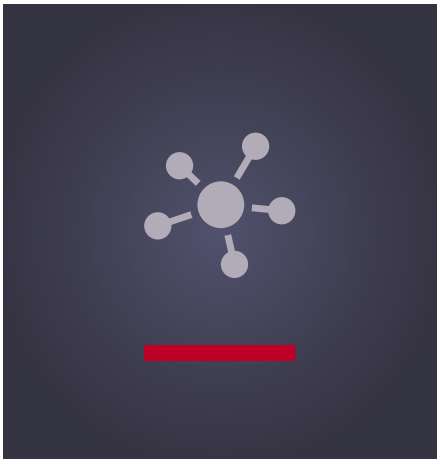
THIS IS THE PATH WHICH WE ALWAYS FOLLOW

OUR AIM:

CONTINUOUS IMPROVEMENT OF THE CUSTOMER SERVICE & REACTION TIME



THOUGHTS ABOUT ENVIRONMENT AND FUTURE VISIONS

01 WE WORK SUSTAINABLY ISO 14001:2015

NORM ISO 14001:2015 - Environmental Management

The international norm for Environmental Management, ISO 14001, sets a focal point on a continuous improvement process as resources needed to achieve the defined aims each relating to the environmental activity of a company.
The continuous improvement process is based on the method of Planning-Processing-Controlling-Optimising

- Planning: Definition of the aims and processes
- Processing: Realisation of the processes
- Controlling: Inspection of the processes
- Optimising: Adapting, if necessary

For this a company should define internal environmental policy, environmental targets and an environmental programme as well as work out an adequate management system.

02 WE ARE CERTIFICATED ACCORDING TO ISO 9001:2015

NORM ISO 9001:2015 QUALITY MANAGEMENT

The norm ISO 9001 sets the minimum standards on a quality management system in order to provide products and services which fulfil the customer's expectations as well as possible official requirements.
For each area quality checks are carried out by means of check lists.
At the same time the management system should be continuously improved.

FUTURE VISION

WE ARE ENVIRONMENTALLY CONSCIOUS & SUPPORT THE RECYCLING PROCESS

RETURN SYSTEM

By request we produce your work wear out of reclaimed raw materials of your old work wear.

Recycled yarns can be offered alternatively out of other basic products (like PET bottles).

MILESTONES

1961
Foundation

- Company LITZ was founded by Gertrude und Rupert Litzlbauer

DESIGN

Individual design & production of any kind of garment by customer request with the support of the up-to-date 3D Design Programme Software.

With own stock range programmes, with own SPECIAL COLOURS in different finishes (CE, flame & Multinorm, Sympatex clothing) we support the decision of the customer for Corporate Fashion Wear.

PRODUCTIONS & QUALITY STANDARDS

We are:
ISO 9001:2015 & ISO14001:2015 certificated. Our fabrics and accessories which we use are generally ÖKOTEX 100 tested.

We continuously carry out quality checks of the garment certifications ourselves in addition (technical & breathable fabric).

We have an own leasing laundry washing unit & checking devices for continuous tests and quality controls in company LITZ and in the productions abroad.

Our productions worldwide are: Minimum standard BSCI certificated, partially also ISO14001, SA8000 and ISO9001.

LOGISTICS

A perfectly coordinated logistics system as well as a new Merchandise Management

Programme with stock expansion in 2017

Perfect care of our customers by continuously trained specialised staff

LITZ - THE FASHION MAKER

STUDIO LITZ

3D - VISUALISATION

Faster in the realisation

With the new introduced 3D visualisation many models and variations can be created and tested, expensive prototypes can be saved and be adjusted easier worldwide.

The period of time from the first design to the ready product will be considerably shorter, the costs less.

Presupposed the simulation is so real as possible-
With the correct pattern data, the adequate material parameter and best with the body of the customer.
